About Me

Hi! I'm Sere Doumbouya, a creative and technically driven Computer Science student at The George Washington University, pursuing a B.S. with a minor in Management.

As a developer, I enjoy solving complex problems, building scalable web applications, and collaborating in agile teams, with experience in React, NestJS, Node.js, MongoDB, AWS, and TypeScript.

My creativity extends beyond coding, I enjoy painting, ranging from geometric and African-inspired designs to realistic landscapes and fun cartoons as well, and I often draw inspiration from my travels, including a recent trip to Paris. Outside of tech and art, I enjoy exploring museums, local markets, and diverse music genres like electronic, techno, French, and Latin music as well.

Fun fact: I speak fluent French, traveled abroad earlier this year. I love combining my artistic sensibility with development, whether crafting visually appealing UIs or designing intuitive user experiences, and I hope to continue merging creativity and code in impactful web projects.
